EXPLANATORY NOTE

Mediacom Broadband LLC and Mediacom Broadband Corporation hereby amend their Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2004, filed on May 13, 2004, as set forth in this Quarterly Report on Form 10-Q/A (Amendment No. 1) (the "Form 10-Q/A"). This Form 10-Q/A amends the following sections on the Form 10-Q:

Part I, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations. The second paragraph under Liquidity and Capital Resources - Investing Activities reflects a typographical correction to delete the last sentence.

Part II, Item 1. Legal Proceedings. The sentence reflects a typographical correction to refer to Note 9.

PART I

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the Company's unaudited consolidated financial statements as of and for the three months ended March 31, 2004 and 2003 and with the Company's annual report on Form 10-K for the year ended December 31, 2003.

Overview

We are a wholly-owned subsidiary of Mediacom Communications Corporation. As of March 31, 2004, our cable systems passed approximately 1.4 million homes and served approximately 811,000 basic subscribers in four states. Many of our cable systems are located in markets that are contiguous with, or in close proximity to, cable systems owned and operated by Mediacom LLC, a wholly-owned subsidiary of our manager.

In 2003, we completed our planned network upgrade program that significantly increased bandwidth and enabled interactivity. As of March 31, 2004, approximately 99% of our cable network was upgraded with 550MHz to 870MHz bandwidth capacity and about 97% of our homes passed were activated with two-way communications capability. Expressed in megahertz, or MHz, bandwidth represents a system's capacity to deliver telecommunication services.

Our upgraded network allows us to introduce additional programming and other products and services such as digital video, video-on-demand, high-definition television and high-speed Internet access. We currently provide digital video services to approximately 224,000 subscribers, representing a penetration of approximately 27.6% of our basic subscribers. We also currently provide high speed Internet services to approximately 169,000 subscribers, representing a penetration of approximately 11.8% of our homes passed. Beginning in the fourth quarter of 2004, we plan to launch in certain of our markets Internet protocol telephony service, which is sometimes referred to as Voice-over-Internet-Protocol, or VoIP, telephony. VoIP telephony will allow us to offer an attractive triple-play bundle of video, data and voice products and services. Bundled products and services offer our subscribers key benefits such as a single provider contact for provisioning, billing and customer care.

We face increasing competition for our video programming services, most notably from direct broadcast satellite service, or DBS service providers. In the first quarter of 2004, competitive pressure from DBS service providers intensified when they launched local television channels in additional markets representing an estimated 9% of our basic subscriber base. Since they have been permitted to deliver local television broadcast signals beginning in 1999, DIRECTV, Inc. and Echostar Communications Corporation, the two largest DBS service providers, have been gradually increasing the number of markets in which they deliver these local television signals. These "local-into-local" launches were usually accompanied by heavy marketing and advertising and were the primary cause of our loss of basic subscribers in recent periods including the first quarter of 2004. As of March 31, 2004, competitive local-into-local services in our markets covered an estimated 84% of our basic subscribers.

Actual Results of Operations**Three Months Ended March 31, 2004 Compared to Three Months Ended March 31, 2003**

The following table sets forth the unaudited consolidated statement of operations for the three months ended March 31, 2004 and 2003 (dollars in thousands and percentage changes that are not meaningful are marked NM):

	Three Months Ended March 31,		\$ Change	% Change
	2004	2003		
Revenues	\$144,662	\$133,665	\$10,997	8.2%
Costs and expenses:				
Service costs	56,117	53,668	2,449	4.6
Selling, general and administrative expenses	31,057	28,153	2,904	10.3
Management fee expense	2,685	2,036	649	31.9
Depreciation and amortization	25,849	28,203	(2,354)	(8.3)
Operating income	28,954	21,605	7,349	34.0
Interest expense, net	(20,995)	(20,289)	(706)	(3.5)
Gain (loss) on derivative instruments, net	(4,159)	(1,634)	2,525	NM
Other expense	(1,136)	(1,131)	(5)	(0.4)
Net income (loss)	\$ 2,664	\$ (1,449)	\$ 4,113	NM
Operating income before depreciation and amortization	\$ 54,803	\$ 49,808	\$ 4,995	10.0%

Use of Operating Income Before Depreciation and Amortization

Operating income before depreciation and amortization, or OIBDA, is not a financial measure calculated in accordance with generally accepted accounting principles (GAAP) in the United States. However, OIBDA is one of the primary measures used by management to evaluate our performance and to forecast future results. We believe OIBDA is useful for investors because it enables them to assess our performance in a manner similar to the method used by management, and provides a measure that can be used to analyze, value and compare the companies in the cable television industry, which may have different depreciation and amortization policies. A limitation of this measure, however, is that it excludes depreciation and amortization, which represents the periodic costs of certain capitalized tangible and intangible assets used in generating revenues in our business. Management utilizes a separate process to budget, measure and evaluate capital expenditures.

OIBDA should not be regarded as an alternative to operating income or net income (loss) as an indicator of operating performance nor should it be considered in isolation or as a substitute for financial measures prepared in accordance with GAAP. We believe that operating income is the most directly comparable GAAP financial measure to OIBDA. The following table sets forth the reconciliation of OIBDA to operating income for the three months ended March 31, 2004 and 2003 (dollars in thousands and unaudited):

	Three Months Ended March 31,	
	2004	2003
OIBDA	\$ 54,803	\$ 49,808
Depreciation and amortization	(25,849)	(28,203)
Operating income	\$ 28,954	\$ 21,605

Revenues

	Three Months Ended March 31,					
	2004		2003		\$ Change	% Change
	Amount	% of Revenues	Amount	% of Revenues		
Video	\$ 116,002	80.2%	\$ 111,882	83.7%	\$ 4,120	3.7%
Data	20,644	14.3%	14,038	10.5	6,606	47.1
Advertising	8,016	5.5%	7,745	5.8	271	3.5
	<u>\$144,662</u>	<u>100.0%</u>	<u>\$133,665</u>	<u>100.0%</u>	<u>\$10,997</u>	<u>8.2%</u>

Video revenues represent monthly subscription fees charged to customers for our core cable television products and services (including basic, expanded basic and analog premium programming, digital cable television programming services, wire maintenance, equipment rental and services to commercial establishments), pay-per-view charges, installation and reconnection fees, late payment fees, and other ancillary revenues. Data revenues primarily represent monthly subscription fees charged to customers for our data products and services and equipment rental fees. Franchise fees charged to customers for payment to local franchising authorities are included in their corresponding revenue category.

Revenues rose 8.2%, largely attributable to an increase in high-speed data customers and basic rate increases applied on our video customers, driven in large part by our own video programming cost increases.

Video revenues increased 3.7% as a result of the aforementioned basic rate increases, partially offset by a 2.8% decline in basic subscribers from 834,000 to 811,000. Digital customers, at 224,000, declined modestly relative to 235,000 a year ago. Our loss in basic subscribers and digital customers resulted primarily from increased competitive pressures by DBS service providers, particularly in those markets where we experienced their "local-into-local" launches, and to a lesser extent from our tighter customer credit policies. To reverse this video customer trend, we are increasing our customer retention efforts and our emphasis on bundling, enhancing and differentiating our video products and services with new digital service packages, video-on-demand, high-definition television, digital video recorders and more local programming.

Data revenues rose 47.1% due primarily to an increase in data customers from 122,000 to 169,000, as well as a gain in average monthly data revenue per data subscriber from \$40.34 to \$42.11. We expect this customer trend in our data business to continue given anticipated demand for our high-speed data service.

Advertising revenues increased 3.5%, with stronger local and regional advertising sales more than offsetting weaker national advertising sales.

Costs and Expenses

Service costs include: fees paid to programming suppliers; expenses related to wages and salaries of technical personnel, who maintain our cable network and perform customer installation activities; high-speed Internet access costs, including costs of bandwidth connectivity, customer provisioning and technical support for our customers; and plant operating costs, such as utilities and pole rental expense. Programming costs, which are payments to programmers for content and are generally paid on a per subscriber basis, have historically increased due to both increases in the rates charged for existing programming services and the introduction of new programming services to our basic subscribers.

Service costs increased 4.6% over the prior year. Of this increase, 60.2% was due to servicing the growth in our data customers, 38.5% was due to greater expensing of labor and overhead costs resulting from the transition from upgrade construction to maintenance activities and the remainder was due to other operating costs related to servicing our customers, partly offset by a decline in total programming costs. Although we experienced higher unit costs for

[Table of Contents](#)

basic programming, these were more than offset by a decrease in analog premium units, basic subscribers and digital customers, as well as a modest increase in launch support received from programmers. We expect programming costs on a per unit basis to continue to rise in 2004, primarily due to price increases reflecting both inflation-indexed and negotiated license fee increases. As a percentage of revenues, service costs were 38.8% and 40.2% for the three months ended March 31, 2004 and March 31, 2003, respectively.

Selling, general and administrative expenses include: wages and salaries for our call center, customer service and support and administrative personnel; franchise fees and taxes; and expenses related to billing, telecommunications, marketing, bad debt, advertising and office administration.

Selling, general and administrative expenses increased 10.3%. Of this increase, 22.2% was due to higher advertising expense related to both in-house advertising and proprietary programming cost increases, 19.5% was due to increased marketing expense related to additional campaigns to promote new services, 16.0% was due to an increase in support personnel, and 15.3% was due to higher taxes and fees as a result of increases in franchise fees and property taxes. As a percentage of revenues, selling, general and administrative expenses were 21.5% for the three months ended March 31, 2004, as compared with 21.1% for the three months ended March 31, 2003. We expect continued growth in advanced services, which include digital cable and high-speed Internet access and, in late 2004, the launch of VoIP telephony service. As a result, we expect our service costs and selling, general and administrative expenses to increase.

Management fee expense reflects charges incurred under our management arrangements with our parent, Mediacom Communications Corporation ("MCC"). Management fee expense increased 31.9% to \$2.7 million for the three months ended March 31, 2004, as compared to \$2.0 million the three months ended March 31, 2003. This increase reflects greater overhead costs charged by MCC during the three month period ended March 31, 2004. As a percentage of revenues, management fee expense was 1.9% for the three months ended March 31, 2004, as compared with 1.5% for the three months ended March 31, 2003.

Depreciation and amortization decreased 8.3% to \$25.8 million for the three months ended March 31, 2004, as compared to \$28.2 million for the three months ended March 31, 2003. The decrease was primarily due to changes, effective July 1, 2003, in the estimated useful lives of our cable systems and equipment in conjunction with the completion of our network upgrade and rebuild program. These changes reduced depreciation by \$11.3 million for the three months ended March 31, 2004. This decrease was offset in part by increased depreciation for investments in our cable network and ongoing investments to continue the rollout of products and services such as video-on-demand, high-definition television and high-speed Internet access. See Note 2 to our consolidated financial statements.

Interest Expense, Net

Interest expense, net, increased 3.5% to \$21.0 million for the three months ended March 31, 2004, as compared to \$20.3 million for the three months ended March 31, 2003. This was primarily due to higher average indebtedness for the three months ended March 31, 2004, offset by lower market interest rates on our variable rate debt.

Loss on derivative instruments, net

We enter into interest rate exchange agreements, or "interest rate swaps", with counterparties to fix the interest rate on a portion of our variable rate debt in order to reduce the potential volatility in our interest expense that would otherwise result from changes in market interest rates. As of March 31, 2004 we had interest rate swaps with an aggregate principal amount of \$500.0 million. These interest rate swaps are accounted for as fair value hedges of debt instruments as prescribed by SFAS No. 133. The changes in their mark-to-market values are derived from changes in market interest rates, the decrease in their time to maturity and the creditworthiness of the counterparties. The aggregate change in value is reported as either a noncash gain or loss on derivative instruments, net. Principally as a result of a downward change during the quarter in market interest rates that are used to fair value our interest swaps, loss on derivative instruments, net, was \$4.2 million for the three months ended March 31, 2004, as compared to a loss on derivative instruments, net of \$1.6 million for the three months ended March 31, 2003.

Other expense

Other expense was \$1.1 million for the three months ended March 31, 2004 and 2003. Other expense primarily represents amortization of deferred financing costs and fees on unused credit commitments.

Net income (loss)

Due to the factors described above, we generated a net income of \$2.7 million for the three months ended March 31, 2004, as compared to a net loss of \$1.4 million for the three months ended March 31, 2003.

Operating Income Before Depreciation and Amortization

OIBDA increased 10.0% to \$54.8 million due to an 8.2% increase in revenues, partially offset by a 4.6% increase in service costs and a 10.3% increase in selling, general and administrative expenses. OIBDA, expressed as a percentage of revenues, was 37.9% for the three months ended March 31, 2004, as compared to 37.3% in the year-ago period.

Liquidity and Capital Resources

As an integral part of our business plan, we have significantly invested, and will continue to invest, additional capital in our cable network to enhance its reliability and capacity, which will allow for the introduction of new advanced broadband services. We also will continue to pursue a business strategy that includes selective acquisitions. We expect to fund our capital requirements through a combination of internally generated funds, and amounts available under our bank credit facilities.

Operating Activities

Net cash flows provided by operating activities were \$20.7 million and \$22.0 million for the three months ended March 31, 2004 and 2003, respectively. The change in net operating cash flows was principally due to the use of cash for certain working capital accounts, principally accounts payable and accrued expenses, partly offset by our generation of net income and an increase in the source of cash from prepaid expenses and other assets for the three months ended March 31, 2004.

Investing Activities

Net cash flows used in investing activities were \$17.5 million and \$32.5 million for the three months ended March 31, 2004 and 2003, respectively. The change in net investing cash flows resulted primarily from a reduction in capital expenditures for the three months ended March 31, 2004, due to the completion of our planned network upgrade and rebuild program.

Our capital expenditures were approximately \$17.2 million for the three months ended March 31, 2004, as compared to \$41.2 million for the three months ended March 31, 2003. We expect prospective capital expenditures to consist primarily of the costs of new advanced service installations and equipment, new plant construction and network replacement.

Financing Activities

For the three months ended March 31, 2004, net cash flows used in financing activities were \$7.7 million as compared to net cash flows provided by financing activities of \$8.9 million for the same period of the prior year. The use of net cash flows in the first quarter of 2004 was due principally to the above-mentioned reduction of capital expenditures, which allowed us to make net repayments of debt, as compared to our net borrowings in the comparable 2003 quarter, which funded capital expenditures in that period.

[Table of Contents](#)

Mediacom LLC, a wholly-owned subsidiary of MCC, has a \$150.0 million preferred equity investment in our Company. The preferred equity investment has a 12% annual dividend, payable quarterly in cash. During the three months ended March 31, 2004 and 2003 we paid in aggregate \$4.5 million in cash dividends on the preferred equity.

Our operating subsidiaries have a \$1.4 billion credit facility expiring in September 2010, of which \$947.0 million was outstanding as of March 31, 2004. We have entered into interest rate exchange agreements with counterparties, which expire from June 2005 through March 2007, to hedge \$500.0 million of floating rate debt. Under the terms of all of our interest rate exchange agreements, we are exposed to credit loss in the event of nonperformance by the other parties of the agreements. However, due to the high creditworthiness of our counterparties, which are major banking firms rated investment grade or better, we do not anticipate their nonperformance. As of March 31, 2004, about 67% of our outstanding indebtedness was at fixed interest rates or subject to interest rate protection.

As of March 31, 2004, our total debt was \$1.35 billion, we had unused credit commitments of about \$444.9 million under our bank credit facility and our annualized cost of debt capital was approximately 6.3%. On such date, approximately \$320.6 million could be borrowed and used for general corporate purposes based on the terms and conditions of our debt arrangements. As of March 31, 2004, we were in compliance with all covenants under our debt arrangements.

As of March 31, 2004, approximately \$8.1 million of letters of credit were issued to various parties to secure our performance relating to insurance and franchise requirements.

Although we have not generated earnings sufficient to cover fixed charges, we have generated cash and obtained financing sufficient to meet our short-term requirements, including our debt service, working capital and capital expenditures. We expect that we will continue to be able to generate funds and obtain financing sufficient to meet our long-term business plan, service our debt obligations and complete our future acquisitions. However, there can be no assurance that we will be able to obtain sufficient financing, or, if we were able to do so, that the terms would be favorable to us.

Critical Accounting Policies

The foregoing discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. Periodically we evaluate our estimates, including those related to doubtful accounts, long-lived assets, capitalized costs and accruals. We base our estimates on historical experience and on various other assumptions that we believe are reasonable. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following represent the most significant and subjective estimates used in the preparation of our consolidated financial statements:

Property, Plant and Equipment

In accordance with Statement of Financial Accounting Standards (“SFAS”) No. 51, “Financial Reporting by Cable Television Companies,” we capitalize a portion of direct and indirect costs related to the construction, replacement and installation of property, plant and equipment, including certain costs related to new video and new high-speed Internet subscriber installations. Capitalized costs are recorded as additions to property, plant and equipment and depreciated over the life of the related assets. We perform periodic evaluations of the estimates used to determine the amount of costs that are capitalized. Any changes to these estimates, which may be significant, are applied in the period in which the evaluations were completed.

Goodwill and Other Intangible Assets

In accordance with SFAS No. 142, "Goodwill and Other Intangible Assets", the amortization of goodwill and indefinite-lived intangible assets is prohibited and requires such assets to be tested annually for impairment, or more frequently if impairment indicators arise. We have determined that our cable franchise costs are indefinite-lived assets. Our annual impairment tests, performed as of September 30, 2003, determined that there was no impairment of goodwill or indefinite-lived intangible assets. There have been no events since then that would require an analysis to be completed before the annual test date.

Inflation and Changing Prices

Our systems' costs and expenses are subject to inflation and price fluctuations. Such changes in costs and expenses can generally be passed through to subscribers. Programming costs have historically increased at rates in excess of inflation and are expected to continue to do so. We believe that under the Federal Communications Commission's existing cable rate regulations we may increase rates for cable television services to more than cover any increases in programming. However, competitive conditions and other factors in the marketplace may limit our ability to increase our rates.

- (2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- (3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- (4) The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Paragraph omitted pursuant to SEC Release Nos. 33-8238 and 34-47986
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- (5) The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information;
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
