We have prepared these unaudited consolidated financial statements in accordance with the rules and regulations of the Securities and Exchange Commission (the “SEC”). In the opinion of management, such statements include all adjustments, consisting of normal recurring accruals and adjustments, necessary for a fair presentation of our consolidated results of operations and financial position for the interim periods presented. The accounting policies followed during such interim periods reported are in conformity with generally accepted accounting principles in the United States of America and are consistent with those applied during annual periods. For a summary of our accounting policies and other information, refer to the our Annual Report on Form 10-K for the year ended December 31, 2006. The results of operations for the interim periods are not necessarily indicative of the results that might be expected for future interim periods or for the full year ending December 31, 2007.

We rely on our parent, MCC, for various services such as corporate and administrative support. Our financial position, results of operations and cash flows could differ from those that would have resulted had we operated autonomously or as an entity independent of MCC.

Mediacom Broadband Corporation (“Broadband Corporation”), a Delaware corporation wholly-owned by us, co-issued, jointly and severally with us, public debt securities. Broadband Corporation has no operations, revenues or cash flows and has no assets, liabilities or stockholders’ equity on its balance sheet, other than a one-hundred dollar receivable from an affiliate and the same dollar amount of common stock on its consolidated balance sheets. Therefore, separate financial statements have not been presented for this entity.

Reclassifications

Certain reclassifications have been made to prior year amounts to conform to the current year’s presentation.

2. RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In September 2006, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 157, *“Fair Value Measurements”* (“SFAS No. 157”). SFAS No. 157 establishes a single authoritative definition of fair value, sets out a framework for measuring fair value, and expands on required disclosures about fair value measurement. SFAS No. 157 will be effective as of January 1, 2008 and will be applied prospectively. We have not completed our evaluation of SFAS No. 157 to determine the impact that adoption will have on our consolidated financial condition or results of operations.

In February 2007, the FASB issued SFAS No. 159, *“The Fair Value Option for Financial Assets and Financial Liabilities — Including an amendment of FASB Statement No. 115”* (“SFAS No. 159”). SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value. This Statement is effective as of the beginning of an entity’s first fiscal year that begins after November 15, 2007. We do not expect that this Statement will have a material impact on our consolidated financial condition or results of operations.

As of June 30, 2007, we had interest rate exchange agreements with various banks pursuant to which the interest rate on $500.0 million is fixed at a weighted average rate of approximately 5.3%. These agreements have been accounted for on a mark-to-market basis as of, and for the three months ended June 30, 2007. ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our unaudited consolidated financial statements as of, and for the three and six months ended, June 30, 2007 and 2006, and with our annual report on Form 10-K for the year ended December 31, 2006.

Overview

We are a wholly-owned subsidiary of Mediacom Communications Corporation ("MCC"). Through our interactive broadband network, we provide our customers with a wide array of broadband products and services, including analog and digital video services, such as video-on-demand ("VOD"), high-definition television ("HDTV"), digital video recorders ("DVRs"), high-speed data access ("HSD") and phone service. We offer triple play bundles of video, HSD, and phone to 95% of our estimated homes passed. Bundled products and services offer our customers a single provider contact for provisioning, billing and customer care.

As of June 30, 2007, our cable systems passed an estimated 1.48 million homes and served 728,000 basic video subscribers in four states. We provide digital video services to 304,000 customers, representing a penetration of 41.8% of our basic subscribers. We also currently provide HSD to 335,000 customers, representing a penetration of 22.7% of our estimated homes passed. We introduced phone service during the second half of 2005, and provided service to about 86,000 customers as of June 30, 2007, representing a penetration of 6.1% of our estimated marketable phone homes.

We evaluate our growth, in part, by measuring the number of revenue generating units ("RGUs") we serve. As of June 30, 2007, we served 1.45 million RGUs, which represent the total of basic subscribers and digital, data and phone customers.

We have faced increasing levels of competition for our video programming services over the past few years, mostly from DBS providers. Since they have been permitted to deliver local television broadcast signals beginning in 1999, DirecTV and Echostar now have essentially ubiquitous coverage in our markets with local television broadcast signals. Their ability to deliver local television broadcast signals has been the primary cause of our loss of basic subscribers in recent years.

Retransmission Consent

Prior to February 2007, cable systems serving our subscribers carried the broadcast signals of 4 local broadcast stations owned or programmed by Sinclair Broadcast Group, Inc. ("Sinclair") under a month-to-month retransmission arrangement terminable at the end of any month on 45-days notice. All of these stations are affiliates of one of the "big-4" networks (ABC, CBS, FOX and NBC) that we deliver to approximately half of our total subscribers.

On September 28, 2006, Sinclair exercised its right to deliver notice to us to terminate retransmission of all of its stations effective December 1, 2006, but subsequently agreed to extend our right to carriage of its signals until January 5, 2007. We and Sinclair were unable to reach agreement, and on January 5, 2007, Sinclair directed us to discontinue carriage of its stations. On February 2, 2007, we and Sinclair reached a multi-year agreement and Sinclair stations were immediately restored on the affected cable systems.

Adjusted OIBDA

We define Adjusted OIBDA as operating income before depreciation and amortization and non-cash, share-based compensation charges. Adjusted OIBDA is one of the primary measures used by management to evaluate our performance and to forecast future results but is not a financial measure calculated in accordance with generally accepted accounting principles (GAAP) in the United States. We believe Adjusted OIBDA is useful for investors because it enables them to assess our performance in a manner similar to the methods used by management, and provides a measure that can be used to analyze, value and compare the companies in the cable television industry, which may have different depreciation and amortization policies, as well as different non-cash, share-based compensation programs. A limitation of Adjusted OIBDA, however, is that it excludes depreciation and amortization, which represents the periodic costs of certain capitalized tangible and intangible assets used in generating revenues in our business. Management utilizes a separate process to budget, measure and evaluate capital expenditures. In addition, Adjusted OIBDA has the limitation of not reflecting the effect of our non-cash, share-based compensation charges.

Adjusted OIBDA should not be regarded as an alternative to either operating income or net income (loss) as an indicator of operating performance nor should it be considered in isolation or as a substitute for financial measures prepared in accordance with GAAP. We believe that operating income is the most directly comparable GAAP financial measure to Adjusted OIBDA.

(1) Represents the total of basic subscribers and digital, data, and phone customers at the end of each period.

(2) Represents revenues for the quarter divided by average number of basic subscribers for such period.

(3) Represents revenues for the quarter divided by average number of RGUs for such period.

Video revenues represent monthly subscription fees charged to customers for our core cable television products and services (including basic, expanded basic and digital cable programming services, wire maintenance, equipment rental and services to commercial establishments), pay-per-view charges, installation, reconnection, and late payment fees, and other ancillary revenues. Data revenues primarily represent monthly fees charged to customers, including commercial establishments, for our data products and services and equipment rental fees. Franchise fees charged to customers for payment to local franchising authorities are included in their corresponding revenue category. Phone revenues represent monthly fees charged to customers. Advertising revenues represent the sale of advertising time on various channels.

Revenues rose 7.4%, largely attributable to growth in our data and phone customers. Average total monthly revenue per basic subscriber grew 11.7% to $82.78. RGUs grew 5.6% year-over-year and average total monthly revenue per RGU grew 1.9% compared with the prior year period.

Video revenues grew 2.0% due to higher service fees from our advanced video products and services, such as DVRs and HDTV, and basic video rate increases, offset in part by a lower number of basic subscribers. During the three months ended June 30, 2007, we lost 12,000 basic subscribers, compared to a loss of 15,800 for the same period last year.

Data revenues rose 18.7%, primarily due to a 17.5% year-over-year increase in data customers.

Phone revenues grew 83.4%, largely due to a 75.5% increase in phone customers. As of June 30, 2007, Mediacom Phone was marketed to approximately 1.40 million of our 1.48 million estimated homes passed, and we expect to continue to market the product to these homes through the end of 2007.

Advertising revenues increased 3.3%, largely as a result of stronger national advertising sales, offset in part by weaker local advertising sales.

Costs and Expenses

Significant service costs and expenses are for: video programming; wages and salaries of technical personnel who maintain our cable network, perform customer installation activities, and provide customer support; our data and phone services, including payments to third-party providers and costs associated with bandwidth connectivity and customer provisioning; and field operating costs, including outside contractors, vehicle, utilities and pole rental expenses. Video programming costs, which are generally paid on a per subscriber basis, represent our largest single expense category and have historically increased due to both increases in the rates charged for existing programming services and the introduction of new programming services to our customers. Video programming costs are expected to continue to grow principally because of contractual unit rate increases and the increasing demands of television broadcast station owners for retransmission consent fees. As a consequence, it is expected that our video gross margins will decline as increases in programming costs outpace growth in video revenues.

Service costs rose 9.9%, primarily due to increases in programming expenses and customer growth in our phone and HSD services. Programming expense increased 7.8%, principally as a result of higher unit costs charged by our programming vendors, offset in part by a lower number of basic subscribers. Recurring expenses related to our phone and HSD services grew 31.4% commensurate with the significant increase of our phone and data customers. Service costs as a percentage of revenues were 40.2% and 39.2% for the three months ended June 30, 2007 and 2006, respectively.

Significant selling, general and administrative expenses include: wages and salaries for our call centers, customer service and support and administrative personnel; franchise fees and taxes; marketing; bad debt; billing; advertising; and costs related to telecommunications for our call centers and office administration.

Selling, general and administrative expenses rose 9.2%, principally due to higher marketing, bad debt and office expenses. Marketing costs rose 22.5% largely due to product and service advertising and mailing campaigns, as well as increased headcount. Bad debt expenses were higher by 27.9% primarily due to unusually low write-offs of uncollectible accounts in the prior year period. Office costs increased by 22.6% primarily due to call center telecommunications charges. Selling, general and administrative expenses as a percentage of revenues were 21.9% and 21.5% for the three months ended June 30, 2007 and 2006, respectively.

We expect continued revenue growth in advanced services. As a result, we expect our service costs and selling, general and administrative expenses to increase.

Management fee expense reflects charges incurred under management arrangements with our parent, MCC. Management fee expense increased 13.7%, reflecting higher overhead costs charged by MCC. As a percentage of revenues, management fee expense was 1.8% and 1.7% for the three months ended June 30, 2007 and 2006, respectively.

Depreciation and amortization expense rose 2.0% compared to the prior year period, due in part to increased deployment of customer premise equipment.

Adjusted OIBDA

Adjusted OIBDA increased by 3.4% due to revenue growth, especially in data and phone, offset in part by increases in related service costs and marketing expenses.

Operating Income

Operating income increased 4.3%, largely due to the increase in Adjusted OIBDA, offset in part by higher depreciation and amortization expense.

Interest Expense, Net

Interest expense, net, increased by 8.5%, primarily due to the expiration of certain interest rate hedging agreements with favorable rates.

Gain on Derivatives, Net

We enter into interest rate exchange agreements, or "interest rate swaps," with counterparties to fix the interest rate on a portion of our variable rate debt to reduce the potential volatility in our interest expense that would otherwise result from changes in variable market interest rates. As of June 30, 2007, we had interest rate swaps with an aggregate principal amount of $500.0 million. The changes in their mark-to-market values are derived from changes in market interest rates, the decrease in their time to maturity and the creditworthiness of the counterparties. As a result of the quarterly mark-to-market valuation of these interest rate swaps, we recorded a gain on derivatives, net amounting to $5.3 million and $0.4 million for the three months ended June 30, 2007 and 2006, respectively.

Net Income

As a result of the factors described above, we recognized net income for the three months ended June 30, 2007 of $12.2 million compared to net income of $4.6 million for the three months ended June 30, 2006.

(1) Represents the total of basic subscribers and digital, data, and phone customers at the end of each period.

(2) Represents revenues for the period divided by average number of basic subscribers for such period.

(3) Represents revenues for the period divided by average number of RGUs for such period.

Revenues rose 6.9%, largely attributable to growth in our data and phone customers. Average total monthly revenue per basic subscriber grew 10.5% to $80.15. RGUs grew 5.6% year-over-year and average total monthly revenue per RGU grew 0.6% from the prior year period.

Video revenues grew 0.7% due to higher service fees from our advanced video products and services, such as DVRs and HDTV, offset by a lower number of basic subscribers. Our performance was impacted by our postponement until the second quarter of basic video rate adjustments that are typically applied earlier in the year, as well as $0.9 million in credits issued to customers because of ice storms. During the six months ended June 30, 2007, we lost 23,000 basic subscribers, compared to a loss of 17,000 for the same period last year. We estimate that the loss of so many basic subscribers in the first quarter of 2007 was primarily due to the Sinclair dispute.

Data revenues rose 17.8%, primarily due to a 17.5% year-over-year increase in data customers.

Phone revenues grew 116.3%, largely due to a 75.5% increase in phone customers.

Advertising revenues increased 8.2%, largely as a result of stronger local advertising sales.

Costs and Expenses

Service costs rose 12.0%, primarily due to customer growth in our phone and HSD services and increases in programming and field operating expenses. Recurring expenses related to our phone and HSD services grew 36.0% commensurate with the significant increase of our phone and data customers. Programming expense increased 6.5%, principally as a result of higher unit costs charged by our programming vendors, offset in part by a lower number of basic subscribers. Field operating costs rose 26.2%, primarily as a result of (i) the purchase of antennas during the Sinclair dispute, which were distributed to our customers so that they could receive the affected off-air broadcast signals, and (ii) higher outside contractor usage. Service costs as a percentage of revenues were 41.5% and 39.6% for the six months ended June 30, 2007 and 2006, respectively.

Selling, general and administrative expenses rose 7.5%, principally due to higher marketing, bad debt and office expenses. Marketing costs rose 27.5% largely due to product and service advertising and mailing campaigns. Bad debt expenses were higher by 30.6% primarily due to unusually low write-offs of uncollectible accounts in the prior year period. Office expenses increased by 20.3%, primarily due to call center telecommunications charges. Selling, general and administrative expenses as a percentage of revenues were 21.7% and 21.6% for the six months ended June 30, 2007 and 2006, respectively.

We expect continued revenue growth in advanced services. As a result, we expect our service costs and selling, general and administrative expenses to increase.

Management fee expense reflects charges incurred under management arrangements with our parent, MCC. Management fee expense increased 12.4%, reflecting higher overhead costs charged by MCC. As a percentage of revenues, management fee expense was 1.9% and 1.8% for the six months ended June 30, 2007 and 2006, respectively.

Depreciation and amortization expense remained relatively unchanged.

Adjusted OIBDA

Adjusted OIBDA increased 0.9%, due to revenue growth, especially in data and phone, partially offset by increases in related service costs and marketing expenses.

Operating Income

Operating income increased 1.2%, due to higher Adjusted OIBDA and relatively unchanged depreciation and amortization expense.

Interest Expense, Net

Interest expense, net, increased by 8.9%, primarily due to the expiration of certain interest rate hedging agreements with favorable rates and, to a lesser extent, higher market interest rates on variable rate debt.

Gain on Derivatives, Net

We enter into interest rate exchange agreements, or "interest rate swaps," with counterparties to fix the interest rate on a portion of our variable rate debt to reduce the potential volatility in our interest expense that would otherwise result from changes in variable market interest rates. As of June 30, 2007, we had interest rate swaps with an aggregate principal amount of $500.0 million. The changes in their mark-to-market values are derived from changes in market interest rates, the decrease in their time to maturity and the creditworthiness of the counterparties. As a result of the quarterly mark-to-market valuation of these interest rate swaps, we recorded a gain on derivatives, net amounting to $3.0 million and $0.4 million for the six months ended June 30, 2007 and 2006, respectively.

Net Income

As a result of the factors described above, we recognized a net income for the six months ended June 30, 2007 of $10.6 million compared to net income of $8.5 million for the six months ended June 30, 2006.

Liquidity and Capital Resources

Overview

We have invested, and will continue to invest, in our network to enhance its reliability and capacity, and in the further deployment of advanced broadband services. Our capital spending has recently shifted from network upgrade investments to the deployment of advanced services. We also may continue to make strategic acquisitions of cable systems. We have a high level of indebtedness and incur significant amounts of interest expense each year. We believe that we will meet our debt service, capital spending and other requirements through a combination of our net cash flows from operating activities, borrowing availability under our bank credit facilities, and our ability to secure future external financing.

As of June 30, 2007, our total debt was $1,624.7 million. Of this amount, $68.2 million matures within the twelve months ending June 30, 2008. During the six months ended June 30, 2007, we paid cash interest of $60.6 million, net of capitalized interest. As of June 30, 2007, we had unused revolving credit commitments of approximately $460.7 million, all of which can borrowed and used for general corporate purposes based on the terms and conditions of our debt arrangements.

For all periods through June 30, 2007, we were in compliance with all of the covenants under our debt arrangements. Continued access to our credit facilities is subject to our remaining in compliance with the covenants of these credit facilities, including covenants tied to our operating performance. There are no covenants, events of default, borrowing conditions or other terms in our credit facilities or our other debt arrangements that are based on changes in our credit ratings assigned by any rating agency. We believe that we will not have any difficulty in the foreseeable future complying with the applicable covenants and that we will meet our current and long-term debt service, capital spending, and other cash requirements through a combination of our net cash flows from operating activities, borrowing availability under our bank credit facilities, and our ability to secure future external financing. However, there is no assurance that we will be able to obtain sufficient future financing, or, if we were able to do so, that the terms would be favorable to us. Our future access to debt financings and the cost of such financings are affected by our credit ratings. Any future downgrade to our credit ratings could increase the cost of debt and adversely impact our ability to raise additional funds.

Operating Activities

Net cash flows provided by operating activities were $49.0 million for the six months ended June 30, 2007 compared to $51.5 million for the comparable period last year. The change of $2.5 million is primarily due to the net change in operating assets and liabilities.

During the six months ended June 30, 2007, the net change in our operating assets and liabilities was $14.7 million, primarily due to an increase in our prepaid expenses and other assets of $21.7 million, offset by an increase in our accounts payable and accrued expenses of $5.6 million and an increase in deferred revenue of $2.2 million.

Investing Activities

Net cash flows used in investing activities, which consisted of capital expenditures, were $59.4 million for the six months ended June 30, 2007, as compared to $49.4 million for the prior year period. Capital expenditures increased $10.0 million, primarily due to higher spending on customer premise equipment.

Financing Activities

Net cash flows provided by financing activities were $5.7 million for the six months ended June 30, 2007, largely due to a net reduction of debt and a dividend payment on preferred members' interest. Net cash flows provided by financing activities were $6.3 million for the comparable period in 2006, largely due to net bank borrowings, a dividend payment to parent and a dividend payment on preferred members' interest.

Other

We have entered into interest rate exchange agreements with counterparties, which expire from 2009 through 2010, to hedge $500.0 million of floating rate debt. These agreements have been accounted for on a mark-to-market basis as of, and for the six months ended June 30, 2007. Our interest rate exchange agreements are scheduled to expire in the amounts of $400.0 million and $100.0 million during the years ended December 31, 2009 and 2010, respectively.

As of June 30, 2007, approximately $13.9 million of letters of credit were issued to various parties as collateral for our performance relating to insurance and franchise requirements.

Contractual Obligations and Commercial Commitments

There have been no material changes to our contractual obligations and commercial commitments as previously disclosed in our annual report on Form 10-K for the year ended December 31, 2006.

Critical Accounting Judgments and Estimates

Use of Estimates

The preparation of our financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. Periodically, we evaluate our estimates, including those related to doubtful accounts, long-lived assets, capitalized costs and accruals. We base our estimates on historical experience and on various other assumptions that we believe are reasonable. Actual results may differ from these estimates under different assumptions or conditions. For a discussion of our critical accounting judgments and estimates that we believe require significant judgment in the preparation of our consolidated financial statements, please refer to our annual report on Form 10-K for the year ended December 31, 2006.

Inflation and Changing Prices

Our systems' costs and expenses are subject to inflation and price fluctuations. Such changes in costs and expenses can generally be passed through to subscribers. Programming costs have historically increased at rates in excess of inflation and are expected to continue to do so. We believe that under the Federal Communications Commission's existing cable rate regulations we may increase rates for cable television services to more than cover any increases in programming. However, competitive conditions and other factors in the marketplace may limit our ability to increase our rates.
